## NEW "PREMIUM SERVICE"

Dear Sirs,

Thanks to its long experience and knowledge related to the development and production of frame systems for Air Handling Units, APS AROSIO SPA has realized a new service called "PREMIUM SERVICE".

APS AROSIO SPA will

- Realize a model box (using the system selected by the customer);
- Support the customer in completing all the documentation requested by the laboratory;
- Organize the schedule of the tests directly with TUV laboratory;
- Organize the delivery/collection of the model box.

**EVERYTHING WILL BE FREE OF CHARGE.** The customer will just pay the 50% of the transport cost to/from TUV and the test directly to TUV Laboratory:

Scope of offer/basis of the test

- Mechanical strength of the casing
- Air leakage of the casing
- Filter-bypass-leakage of the casing
- Thermal transmittance of the casing
- Thermal bridging factor of the casing
- Acoustic insulation of the casing

on a model box according to the terms of reference of the standard DIN EN 1886 (07/2009).

APS AROSIO SPA will grant that the certification (with your company name on it – APS AROSIO SPA will NOT appear in the documents/final certification) will give you the agreed results (the performances will be agreed before activating the service).

IF NOT, APS AROSIO SPA will give you back the money you spent for the tests.

Please get in touch – with your APS AROSIO SPA's referent for more information/details.

I remain, best regards  
A.P.S. AROSIO SPA  
Luca Arosio  
Sales Director
